Financing and Water Heater Lease Program

Powell-Clinch Utility District

Presents

Financing With Comfort

Our new HVAC financing program
in partnership with

First National Bank

Call PCUD today for more details
on financing a new HVAC system
or natural gas appliance.

PCUD's water heater lease program allows our customers to "lease" a **natural gas or propane water** heater over a four year period. During this time they are required to make monthly payments (determined by choice of water heater). Powell Clinch Utility will cover all warranty issues and service calls during this four year lease period at no additional cost to the customer.

They may choose one of the following models:

- A. 40 or 50 Gallon Standard Vent
- B. 40 or 50 Gallon Direct Vent
- C. 40 or 50 Gallon Power Vent

The customer will need to come in the office and sign the lease agreement. Proof of ownership must be presented before the lease agreement can be approved.

If monthly payments are not made, service is discontinued, propane provider changed, or if the lessee moves before the lease is up, this will **VOID** the lease and the full amount owed will be due immediately.

The lease program is *only* available to current Powell Clinch Customers. Call our office or ask a Customer Service Representative for more details.
